TORM AWARDED FOR ITS ENVIRONMENTAL REPORT

Hellerup, 2 October 2009 – TORM has received an award for its Environmental Report 2008 in the category of best CO₂ reporting. The award was presented by the Danish Association of Chartered Financial Accountants and the Danish newspaper Børsen in connection with their annual financial reporting awards.

“The company’s Climate Strategy 2020 is presented simply and clearly, with CO₂ reduction goals... TORM proves that relevant CO₂ reporting need not be complicated” states the selection committee as part of its motivation for giving TORM the award.

“TORM’s environmental report begins with an excellent presentation of the company’s new CSR strategy, how it creates value for the company’s key stakeholders and, as a result, improves the company’s ability to generate satisfactory business results,” the motivation continues.

The goal in TORM’s climate strategy for 2020 is to reduce CO₂ emissions per vessel by 20 per cent and CO₂ emissions at office locations by 25 per cent per employee relative to 2008.

“Of course, we are proud to receive recognition for our work on CSR and CO₂ reporting, in particular. It supports our strong conviction that it makes sense from a business perspective to focus our efforts on social responsibility, including climate and environmental responsibility,” says Mikael Skov, CEO of TORM.

TORM’s Environmental Report 2008 can be downloaded from the company’s website (www.torm.com).
