TORM COMMENDED FOR CLIMATE CHANGE DISCLOSURE

Hellerup, 29 October 2009 – TORM has been commended by the Carbon Disclosure Project (CDP), which represents 475 institutional investors with UDS 55 trillion in assets under management, for its approach to climate change disclosure.

With a score of 73, TORM is among the leading Nordic companies within climate change disclosure. Thus TORM is featured in CDP's Carbon Disclosure Leadership Index as one of five Danish companies which have displayed the most professional approach to climate change disclosure practices. Companies are scored on their climate change disclosure and high scores indicate good internal data management and understanding of climate change related issues affecting the company.

The Leadership Index provides an evaluation tool for institutional investors and it comprises the top scoring 10% of companies. The Leadership Index is based on analysis of the responses to CDP's 2009 questionnaire which focused on greenhouse gas emissions, emissions reduction targets and risks and opportunities associated with climate change.

"Naturally we are very happy as well as proud to receive this recognition and be included in the Carbon Disclosure Leadership Index. It proves to us once again that we are on the right track with our approach to environment management and reporting. As one of the major shipowners in Denmark, TORM has an obligation to be a role model within this area. That is why we have set an ambitious target of 20% CO2 emission reduction pr. vessel in 2020," says Mikael Skov, CEO TORM.

"Companies recognised in the Carbon Disclosure Leadership Index are rewarded for high quality responses to CDP, which demonstrate a good understanding of how climate change is and will continue to impact their business. Companies which control their risks today, manage their emissions and seize the opportunities to produce low carbon goods and services, will be the best placed to prosper in a low carbon economy of the future," says Paul Dickinson, Chief Executive of the Carbon Disclosure Project.

CDP launched the Nordic Report 2009 at the Carlsberg Museum in Copenhagen on 27 October.

The Company operates a combined fleet of more than 140 modern vessels, principally through a pooling cooperation with other respected shipping companies who share TORM's commitment to safety, environmental responsibility and customer service.

TORM was founded in 1889. The Company conducts business worldwide and is headquartered in Copenhagen, Denmark. TORM's shares are listed on NASDAQ OMX Copenhagen (ticker TORM) as well as on the NASDAQ in New York (ticker TRMD). For further information, please visit www.torm.com.

About CDP:

The Carbon Disclosure Project (CDP) is an independent not-for-profit organisation holding the largest database of corporate climate change information in the world. CDP gathers data through its annual Information Requests on behalf of institutional investors, purchasing organisations and government bodies. Since its formation in 2000, CDP has become the gold standard for carbon disclosure methodology and process, providing essential climate change data to the global market place.
